INFORMATION TECHNOLOGY

ITS Libya offers engineering, consultancy, procurement and implementation services as well as after-sales support including but not limited to the following:

Enterprise Solutions (Software Systems)

- Enterprise Resource Planning systems (ERP)
- Maintenance Management Information Systems (MMS)
- Hospital Information Management Systems (HIS)
- Patient Entertainment Systems
- University and School Information Management Systems (UIS)
- Billing, Mediation and Network Management systems for Landline and Mobile Network operators
- Data mining and warehousing
- Manufacturing costing and control
- Banking solutions
- Document and Content Management solutions
- Government and Municipalities IT solutions; e-Government solutions
- Utility Company Management systems
- Law enforcement management systems (border/passport control, criminal investigation)
- Portal and e-Business solutions
- Laboratory Information Management Systems (LIMS)
- Hospitality information Management systems
- Hotel Entertainment Systems
- Facilities Access Control (security/payroll)
- Remote Monitoring & Sensing Systems for Applications in Oil & Gas Sectors
- Customer Relationship Management (CRM)

Telecommunications

- Engineering, consulting, procurement and implementation services in Wide Area Network (WAN) and Very Small Aperture Terminal (VSAT) satellite communication technologies
- Wireless Communications Systems using secure technologies (infrared, free space optics, microwave, etc.)
- Telecom Management Systems
- Wide/Metropolitan Area Networking
- Voice and Telephony solutions including IP Telephony (IPT) and Voice-Over-IP (VoIP)
- Enterprise communication solutions incorporating such products as deskset phones, paging systems, DECT phone, office building switches and switchboards, call center systems, voicemail software, and cabling among others.
- Intelligent Communications solutions
- Solutions for Telephony, Unified Communications, Contact Centers and Communications Enabled Business Processes.
- PABX Billing Systems for hotels, enterprises, hospitals, etc.

- Wireless data communication including WiMax solutions

Network Infrastructure

- Our network engineering team offers a full complement of secure local area network (LAN) and WAN design and implementation services, including:
 - Network project management
 - Requirements analysis and definition
 - Design and implementation planning
 - Installation, configuration and testing
 - Maintenance planning
 - User training
 - Network tuning and troubleshooting
 - Technology consulting: evaluations and recommendations

Our Specialties

- Information technology infrastructure analysis
- Best-of-breed and emerging technologies
- High bandwidth, high availability networks
- Remote connectivity solutions for efficient telecommuting or remote site start-up
- Internet connectivity solutions
- Intranet/Extranet services; complete solutions for establishing or improving electronic communications
- Large IP networks and complex routing solutions
- Network and/or computer platform migrations
- Firewall design and installation
- Security audits, network and systems risk analyses
- Automated network and systems management solutions
- Remote network systems management and troubleshooting solutions
- IP Telephony - Voice Over IP (VoIP)

Security Services

- LAN & WAN security
- Intrusion detection
- Vulnerability assessment
- Server hardening
- Server protection
- Data & E-mail encryption (Full PKI solutions)
- IP Surveillance (IP-CCTV) and Remote Monitoring Systems (Wireless, IP)
- Fire and Physical Intrusion Detection
- Public Address Systems
- Access Control
- Nurse Call Systems
- Paging systems
